DIAGEO

A strong business, getting stronger

- Reiterating our medium term guidance
- Increased presence in the faster growing markets, pricing globally, growth in US spirits, and premiumisation are driving net sales growth and margin improvement
- Continued investment behind our strategy
- Achieved:
 - 9% organic operating profit growth*
 - 9% eps growth**
 - >£125 million increase in free cash flow
- And we have increased the interim dividend by 9%

Cautionary statement concerning forward-looking statements

This presentation contains 'forward-looking' statements. These forward-looking statements can be identified by the fact that they do not relate only to historical or current facts. In particular, forward-looking statements include all statements that express forecasts, expectations, plans, outlook and projections with respect to future matters, including trends in results of operations, margins, growth rates, overall market trends, the impact of interest or exchange rates, the availability or cost of financing to Diageo, anticipated cost savings or synergies, expected investments, the completion of Diageo's strategic transactions and restructuring programmes, anticipated tax rates, expected cash payments, outcomes of litigation, anticipated deficit reductions in relation to pension schemes, general economic conditions and all statements on the slide "outlook statements". By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements, including factors that are outside Diageo's control.

These factors include, but are not limited to:

- global and regional economic downturns;
- increased competitive product and pricing pressures and unanticipated actions by competitors that could impact Diageo's market share, increase expenses and hinder growth potential;
- the effects of Diageo's strategic focus on premium drinks, the effects of business combinations, partnerships, acquisitions or disposals, existing or future, and the ability to realise expected synergies and/or costs savings;
- Diageo's ability to complete existing or future business combinations, restructuring programmes, acquisitions and disposals;
- legal and regulatory developments, including changes in regulations regarding production, product liability, distribution, importation, labeling, packaging, consumption or advertising; changes in tax law, rates or requirements (including with respect to the impact of excise tax increases) or accounting standards; and changes in environmental laws, health regulations and the laws governing labour and pensions;
- the costs associated with monitoring and maintaining compliance with anti-corruption and other laws and regulations and the costs associated with investigating alleged breaches of internal policies or laws, whether initiated internally by external regulators, and any penalties or fines imposed as a result of any breaches;
- developments in any litigation or other similar proceedings (including with tax, customs and other regulatory authorities) directed at the drinks and spirits industry generally or at Diageo in particular, or the impact of a product recall or product liability claim on Diageo's profitability or reputation;
- developments in the Colombian litigation, Korean customs dispute, thalidomide litigation or any similar proceedings;
- changes in consumer preferences and tastes, demographic trends or perception about health related issues, or contamination, counterfeiting or other circumstances which could harm the integrity or sales of Diageo's brands;
- changes in the cost or supply of raw materials, labour, energy and/or water;
- changes in political or economic conditions in countries and markets in which Diageo operates, including changes in levels of consumer spending, failure of customer, supplier and financial counterparties or imposition of import, investment or currency restrictions;
- levels of marketing, promotional and innovation expenditure by Diageo and its competitors;
- renewal of supply, distribution, manufacturing or licence agreements (or related rights) and licenses on favourable terms when they expire;
- termination of existing distribution or licence manufacturing rights on agency brands;
- disruption to production facilities or business service centres, and systems change programmes, existing or future, and the ability to derive expected benefits from such programmes;
- technological developments that may affect the distribution of products or impede Diageo's ability to protect its intellectual property rights; and
- changes in financial and equity markets, including significant interest rate and foreign currency exchange rate fluctuations and changes in the cost of capital, which may reduce or eliminate Diageo's access to or increase the cost of financing or which may affect Diageo's financial results and movements to the value of Diageo's pensions funds.

All oral and written forward-looking statements made on or after the date of this presentation and attributable to Diageo are expressly qualified in their entirety by the above factors and the 'Risk factors' contained in Diageo's Annual Report on Form 20-F for the year ended 30 June 2012 as filed with the US Securities and Exchange Commission (SEC). Any forward-looking statements made by or on behalf of Diageo speak only as of the date they are made. Diageo does not undertake to update forward-looking statements to reflect any changes in Diageo's expectations with regard thereto or any changes in events, conditions or circumstances on which any such statement is based. The reader should, however, consult any additional disclosures that Diageo may make in any documents which it publishes and/or files with the SEC. All readers, wherever located, should take note of these disclosures.
